

Dulux® X-pert Waterborne Alkyds

Alkyd Performance,
Latex Convenience

Water-based Product with Alkyd Performance

Dulux X-pert Waterborne Alkyds are premium quality formulations with advanced alkyd emulsion technology, containing lower levels of volatile organic compounds (VOCs) and odour than a traditional alkyd paint. With excellent coverage, hiding power, and durability their superior levelling properties provide a smooth, streak-free, finish that withstands frequent washing and resists chipping and abrasion.

Features & Benefits

Extremely Durable & Washable

Chip and abrasion resistant, even with frequent washing.

Fast Dry Time

An estimated re-coat time of 4 hours allows for multiple coats in one day.

Low VOCs

A low-odour formula that provides better indoor air quality with minimal disruption to occupied areas.

High-Hiding

Fewer coats to obtain maximum coverage.

Superior Levelling

Results in a smooth, streak-free, finish.

Yellowing Resistant Whites

Stays whiter for longer compared to traditional alkyd paints.

Beautiful Flow and Levelling

All the finishes we offer for doors and trim have good flow and levelling but the Dulux X-pert Waterborne Alkyd Finishes are even better. In this laboratory test we applied a thick coating of each and soon after application, we distressed both products. You can see that the Dulux X-pert Waterborne Alkyd Semi Gloss still flowed out perfectly. The conventional latex product had set up after the same amount of time. Not as good as the flow from a good alkyd, but better than from most latex finishes.

Outstanding Primer Adhesion

The Dulux X-pert Waterborne Alkyd Primer shows excellent adhesion over a wide variety of substrates. The photography on the right shows the adhesion of the Dulux X-pert Waterborne Alkyd Primer to a glossy alkyd, aged for over a year. While we would always recommend good surface preparation, cleaning and sanding – isn't it good to know that the Dulux X-pert Waterborne Alkyd will adhere in both instances.

Sanded Substrate (Dulux 23010)

Aged Alkyd Adhesion -
Unsanded Substrate (Dulux 23010)

Excellent Stain Blocking Primer

This very early Picasso was obliterated with only one coat of the Dulux X-pert Waterborne Alkyd Primer. Of course, we make no critical judgment on the quality of the work, but it's good to know you have a product that can give the child a fresh canvas to work on.
